DIY MECH KITS

CONSTRUCT IT
DIY Mechanical Kits

The ultimate In fun & educational construction sets suitable for children for ages 8 & up!

The Construct It range has gone from strength to strength since its inception. Teaching children, the basics of engineering and mechanics, Construct It kits are all about children learning as they have fun. Each construction kit comprises of strong metal parts and includes real tools. Children will be utilizing and refining their fine-motor skills as they attach each piece.

Construct It kits are great way for a child to truly embrace their creativity. Each kit comes with detailed instructions that break down each step of the process. Children are also encouraged to think outside of the box and develop an understanding of the way things are made. While each kit in the Construct It series has a theme, children will learn new skills and can use their imagination and creativity to come up with all kinds of awesome vehicles, structures, and inventions.

Construct It Key Features

Fine Motor Skills	Creativity	That Real Feel
Instructions	Logical Thinking	Real Tools

Benefits

LETS GO!

Introduction

The Construct-It range is more collectible and addictive than ever before. Our new Construct-It Miniature Constructables range offers little engineers the same kind of construction-based fun as the full-size range, but in miniature form. Real tools, real stainless-steel parts, and real construction fun are what this range is about.

The miniature nature of these sets keeps the costs and storage space down, but it also adds a whole new level of collectability to the range. No matter if they are playing on their own or playing and trading with their friends, Construct-It Miniature Constructables series is packing a ton of fun with vehicles that are ready for action!
